## **HEARING SOLUTIONS:**

*Detection, protection  
and validation.*

*Experts you can trust*

What your workers hear—or don't hear—while on the jobsite can be damaging to not only their ears but to their health, too. Exposure too high, or even low-level noises, can cause permanent hearing loss without proper ear protection. Loud noises not only harm your ears but can contribute to a reduction in workplace productivity. Keep your workers safe by scheduling regular hearing screenings and using the appropriate ear protection.

**Premier Safety** is the one-stop source for all your protective needs. From reusable earplugs to earmuffs, our full line of ear protection will help to reduce noises near and far.

**From proper care to proper usage, asking the right questions can help keep workers safe.**

- ▶ How do I select the appropriate ear protection?
- ▶ Are our earplugs or earmuffs the right fit and comfort?
- ▶ How do we ensure our employees are using the protection provided?
- ▶ Are our employees using ear protection appropriately?
